SUMMARY

Electronics & Communications Engineering graduate with hands-on experience in technical support, web development, CRM platforms, workflow automation, and digital operations. Experienced in building and maintaining web-based projects, configuring digital workflows, supporting users and technical systems, and working with CRM and automation tools. Currently developing a portfolio focused on web applications, CRM workflows, AI, automation, and practical digital solutions, with a strong foundation in HTML, CSS, JavaScript, SQL, CRM platforms, and technical troubleshooting, along with a continuous commitment to expanding skills in AI, automation, and software technologies.

PROFESSIONAL EXPERIENCE

Technical Support Representative (Medical Healthcare Account) March 2026 - September 2026

- Provided technical support and troubleshooting for system and user-related issues.
- Diagnosed problems, identified root causes, and provided appropriate technical solutions.
- Navigated multiple systems and digital tools to investigate and resolve issues efficiently.
- Documented technical issues, troubleshooting steps, and resolutions accurately.
- Escalated complex issues to specialized teams with complete technical documentation.
- Applied problem-solving, system navigation, and technical troubleshooting skills in a fast-paced environment.

Digital Marketing Trainee January 2026 - February 2026

- Completed hands-on training in CRM systems, workflow automation, email marketing, customer support, and lead management using GoHighLevel and ActiveCampaign.

Engineering Internship June - August 2025

- Assisted the Engineering Department with technical support and troubleshooting.
- Organized and analyzed operational data using Microsoft Excel.
- Utilized Excel functions including IF, VLOOKUP, Sorting, and Filtering.
- Maintained technical documentation and internal reports.
- Supported administrative and engineering operations.

EDUCATION

Bachelor of Science in Electronics Engineering August 2021 - July 2025

University of Rizal System Morong - Morong Campus

Relevant Coursework:

- Data Analysis and Reporting
- Technical Documentation
- Hardware and Software Troubleshooting
- Programming Fundamentals
- AI-Based System Development
- Problem Solving
- Research and System Design

CERTIFICATIONS

- Introduction to HTML, CSS, JavaScript, SQL and Python — SoloLearn
- The Origins I: HTML and CSS — CodeX
- Canva
- Digital Marketing Training

ADDITIONAL EXPERIENCES (August 2021 - July 2025)

- Technical Representative — IECEP Rizal Chapter
- Technical Representative — IECEP URSM Student Chapter
- Student Representative
- Vice President – Internal
- President / Organizational Leadership Experience

PROJECTS

AI-Based Eggplant Leaf Disease Detection (Thesis)

- Developed a deep learning-based disease classification system using Roboflow and Raspberry Pi.
- Prepared and augmented image datasets for AI model training.
- Implemented real-time disease detection and treatment recommendations.

Daywell – Full-Stack Planner Web App (daywell-project.vercel.app)

- Built a full-stack daily planner with Next.js 16, React 19, TypeScript, and Supabase, deployed on Vercel.
- Implemented email-confirmed authentication, recurring tasks, a focus timer, a calendar with events, and daily progress tracking.
- Used Claude Code as an AI pair programmer from spec to production, and reviewed every change to the data model, security, and UI.

Agham Setlist – Worship Team Setlist Manager (setlist-agham.vercel.app)

- Developed a mobile-friendly web app to manage worship lineups, chords, and lyrics for a church youth team.
- Designed it as an installable web app so members can pull up setlists quickly on their phones during practice and service.
- Deployed on Vercel and maintained it based on feedback from the team.

Personal Portfolio Website

- Hand-built a responsive portfolio in plain HTML, CSS, and JavaScript without a framework.
- Added interactive sections (card carousel, project showcase, light/dark mode) and a contact form that opens a pre-filled email.
- Built with AI-assisted development and hosted on GitHub Pages.
